

Two Postdoctoral Research Positions in Public Transportation

The Department of Transport Engineering and Logistics at the Pontificia Universidad Católica de Chile host of the [ALC-BRT Centre of Excellence \(www.BRT.cl\)](http://www.BRT.cl), is currently looking for **two** postdoctorate or experienced researchers to work in our Research group. We have a number of projects in Public Transportation and we would expect that the successful applicant(s) would also be collaborating with researchers at The ALC-BRT Centre. Individuals with research interests in any domain regarding public transportation, including: planning, design, financing, economics, demand modeling, operations and control are especially encouraged to apply.

Job Description:

Participate in BRT related research projects associated to the [ALC-BRT Centre of Excellence](http://www.BRT.cl). Propose and develop new research projects in Public Transportation. Write research papers and reports. Deliver conference and other presentations.

Requirements:

We are seeking applicants with a PhD (or substantial progress towards a PhD) in an area related to Public Transportation. It is important that the applicant is able to work collaboratively, and international experience is desirable. Candidates need not be fluent in Spanish; we encourage applications from abroad. They must exhibit excellent oral and written communication skills and an aptitude for teamwork.

Information and application: To apply, interested applicants should forward their CV including a publication list, contact details of three references and a one page description of their experience and research interests related to this position. Please send application information and/or request for more information to Prof. Juan Carlos Muñoz (jcm@ing.puc.cl).

Review of applications starts immediately and the positions will remain open until successful candidates have been found.
